

Get an Energy Analysis

Help your home save energy and money

The first step toward making your home more energy efficient and comfortable is finding out how well your house is performing - the good and the bad.

An Energy Analysis is a science-based approach to finding where your home may be leaking energy and money.

The Analysis will assess all the major energy efficiency features of your home; air leaks, cooling and heating systems, water heating system, insulation, windows, attached lighting fixtures, major appliances, solar systems (if any) and other energy uses.

A Home Energy Analysis...

- Provides a customized evaluation of your home's energy use
- Uses cutting edge technologies
- Identifies specific opportunities to stop wasting energy
- Qualifies for up to \$750 in rebates available now

The next step is consulting with your Energy Upgrade Expert to determine the scope of work.

Financing is currently available for your energy improvements. Contact the Sonoma County Energy Independence Program (SCEIP) for more information on financing options:

sceip@sonoma-county.org

After Your Project: The HERS II Rating

After completing your energy improvement projects, a final "test-out" rating determines the results and gets you a HERS II Rating Certificate. Ratings are conducted by independent and certified HERS II professionals trained in a state-of-the-art energy efficiency evaluation system. HERS II Raters do not do the actual work on your home.

The HERS II Rating Certificate

a report card for your home

- Find out your home's efficiency rating up to 250 points
- Itemize your home's major energy efficiency features
- Estimate your home's annual energy use, operating cost and greenhouse gas emissions

The Whole House Approach

Increasing your home's efficiency is more than switching out light bulbs or buying new appliances. It's approaching your house as a complete system with heating, air-conditioning, insulation, water and other systems working together more effectively to reduce energy use and help lower your utility bills.

The results of your Energy Analysis will show you specific ways to improve your home's energy efficiency and comfort. Working with an Energy Upgrade Expert, you can plan and complete a project that will benefit your family now...and for generations.

Save Up to 75% in Rebates!

SCEIP offers rebates for residential energy analyses and ratings.

Submit your application, utility authorization, final invoice, rating certificate and recommendations report to us, and we will pay up to 75% of the total as outlined below:

- 75% (up to \$525 maximum) for Test-In
- 75% (up to \$750 maximum) for Test-In & Test-Out

Non PG&E Customers

Only PG&E customers qualify for the “Whole House” rebates offered under Energy Upgrade California. However, residents of Healdsburg and any other non-PG&E customers may opt to have an energy analysis or rating so they may see what their home’s rating and energy efficiency needs are. SCEIP offers a 75% rebate for this analysis or rating.

Getting an Energy Analysis without Efficiency Projects

Any Sonoma County home owner may choose to have an energy analysis or rating performed on their home. Immediate plans for energy efficiency improvements are not required. SCEIP still offers a rebate of up to \$525 toward the analysis or rating.

Call or visit the website of **Energy Upgrade California™** in Sonoma County.

Learn about your house as a system with a **Home Energy Analysis**.

Consult with your Energy Upgrade Expert to determine the best project plan for your situation and to qualify for rebates.

Secure your financing either through **SCEIP** or other options available to you. **Maximize the incentives and rebates** available to you.

Complete your projects including energy efficiency, water conservation and even renewable generation.
Reap your rewards: rebates, a Home Energy Rating, lower energy costs, and a more comfortable and healthier home.
